

## **Renz Addiction Counseling Center**

# **Restoring Hope, Recovering Lives...For 48 Years**

Renz Addiction Counseling Center is the community resource for comprehensive addiction services – providing prevention education and outpatient treatment related to alcohol, drugs and gambling problems. Renz Center's Clinical Services has a team of professionals to help clients through each step of the recovery process. From self discovery and counseling to learning new life skills and healthy behaviors, clients are taught the necessary skills to break the addiction cycle. During treatment, an individual can see improvements in self confidence, -image and -respect. Services are tailored to meet each adolescent or adult's needs, and may include: individual counseling, group sessions, family programs, and DUI services. Treatment is confidential and affordable.

Chemically dependent women often bring to treatment a unique history and set of needs. Renz Center's Passage Program is proud to be the oldest treatment program for women in Illinois, offering a nurturing environment to begin to rebuild their lives. Free evening childcare is available for clients while attending treatment.

Renz Center strives to provide the most effective preventative and clinical care in a safe and nurturing environment through a teamwork approach. Our Model programs for youth achieve positive changes in behavior regarding delaying and preventing substance use. The Center also maintains an HIV/AIDS prevention program for those at risk of contracting the virus. Free testing and counseling is available, with a special program for Latinas.

For National Problem Gambling Awareness Week, March 1-7th, Renz Center is offering free screenings on Wednesday March 4th from 1-3 pm at the Elgin office.
